

WORKFLOW MANAGEMENT SPECIALIST OF THE YEAR

Edgewater Markets Santiago

CHILE

Edgewater Markets is a global leader in technology-driven trading solutions and execution services within the institutional market. The tech specialists provide software solutions to financial organisations which optimise their trading and offer competitive and efficient access to global markets. Typical clients include financial institutions looking to upgrade their technology and those based within emerging markets whose infrastructure has yet to fully incorporate electronic systems. The Santiago-based company is a trusted provider to over 350 global clients, including banks, asset managers, brokers, corporates and other financial essentials.

The judges were particularly impressed with the comprehensive provisions offered by Edgewater Markets, which has quickly become a market leader in South America. The experts fill a niche for clients, providing execution and technology services that grow businesses both locally and globally. Their modern tech architecture is extremely customisable, adapting to each local market's unique requirements while expanding and promoting their client's brand name and presence. By blending technological upgrades with global market credit remediation, distribution and trade optimisation, Edgewater Markets' partnership with its clients goes well beyond simply providing technology.
